Abstracts

According to Statistics MRC, the Global Manure Spreaders market is expected to grow at a CAGR of 8.6% during the forecast period. Support from government in the form of subsidies is impelling the market growth. However, rising sales of pre-owned machinery is inhibiting the market growth.

Manure spreader is a machine that is used to spread fertilizers over a land which is capable of being ploughed and used to grow crops. A typical (modern) manure spreader consists of a trailer towed behind a tractor with a rotating mechanism driven by the tractor's power take off. Commercial agricultural manure spreaders and liquid manure injection equipment are suitable for land application of food processing waste. Nutrients in the waste are taken up by crops or recycled into the soil. This is used for transferring barnyard manure, composted manure from stores to the fields.

Amongst distribution channel, online stores segment accounted for the largest market share in the global market, due to the distributors are wholesalers who sell their products to the retailers who in turn, sell directly to end-users. North America is expected to have the largest market share and dominated the market during the forecast period, due to rapid expansion in urbanization and industrialization have led to the scarcity in labor resources in the region. This will increase the demand for landscaping services.

Some of the key players in the global Manure Spreaders market include Deere and Company, AGCO Corporation, Claas Agricultural machinery company, CNH Industrial N.V., Tirth Agro Technology, Agrihire Ltd, Lely Holding S.à r.l., KUHN, Kubota Corporation, Delica co.
