According to Statistics MRC, the Global Marine Fuel Injection market is accounted for \$4.24 billion in 2015 and is expected to reach \$5.65 billion by 2022 growing at a CAGR of 4.1% from 2015 to 2022. Growth in international sea trade, increase in commercial vessels, advent of electronic and methanol fuel injection systems, and stringent marine regulations imposed by International Maritime Organization are fuelling the market growth. Providing with different marine fuel injection systems for diverse regions is the major challenge posed by manufacturers. High capital requirement and huge investments for R&D are some of the factors restraining the market growth.

Technological advancements in this field led by the new firms are expected to boost the demand for marine injection market.

Commercial vessel application dominates the market during the forecast period followed by inland waterways segment. The favorable growth is attributed to the increased demand in regions such as Africa, South America, and Europe. Fuel injector component holds the major share of the global market. Asia-Pacific region is the largest market strongly driven by China, South Korea, Japan and India.
