## Abstracts

According to Statistics MRC, the Global Marine Interiors Market is accounted for \$2.75 billion in 2020 and is expected to reach \$7.62 billion by 2028 growing at a CAGR of 13.6% during the forecast period. Growing maritime tourism industry, rise in river cruise market and growth in refurbishment market is driving the market growth. However, high downtime in retrofitting ships is hampering the growth of the market.

Marine interior design provides the ability to capture the space that is needed early in the design process, allowing interior designers to roughly estimate the area which is required to showcase the essential interior design. The ship's interior design promotes the reuse of standard details such as panel styles and corner trims, which can be catalogued and reused.

Based on the end user, the refit segment is going to have lucrative growth during the forecast period due to the rising need to upgrade the interior of cruise and yachts every three years. Therefore, various cruise lines are adopting a refurbishment program to improve or partially renovate the ship's interior, reducing the high capital expenditure. By geography, Europe is going to have high growth during the forecast period due to rising demand for leisure and tourists' activities in Europe.

Some of the key players profiled in the Marine Interiors Market include ALMACO, Aros Marine, Forbo Flooring Systems, Kaefer, Marine Interiors, Mivan Marine Ltd & MJM Marine, NORAC, OY Lautex AB, Precetti Inc., R&M Group, Terence Disdale, Tillberg Design Of Sweden and Trimline.
