Abstracts

According to Stratistics MRC, the Global Master Patient Index Software Market is accounted for $776.40 million in 2020 and is expected to reach $1,936.11 million by 2028 growing at a CAGR of 12.1% during the forecast period. The adoption of cloud-based technologies and digitalization of healthcare processes are the factors driving the market growth. However, the high cost of software is hampering the growth of the market.

A master patient index software is a tool that is applied to perforate oil and gas wells in equipment for production. The width of the gun used is frequently determined by the presence of wellbore constraints or limitations commanded by the surface facilities.

Based on the type, the software segment is going to have lucrative growth during the forecast period due to growing advancements in new and existing master patient index software, and the adoption of the software in the healthcare system. By geography, North America is going to have high growth during the forecast period due to the increasing adoption of this software in the region.

Some of the key players profiled in the Master Patient Index Software Market include Allscripts Healthcare Solutions, Inc., Intersystems Corporation, Just Associates, Inc., McKesson Corporation, MEDITECH, NextGate, Oracle Corporation, QuadraMed Affinity Corporation, Verato, and Wipro Limited.
