Abstracts

According to Stratistics MRC, the Global Mechanical Ventilators market is expected to grow at a CAGR of 6.4% during the forecast period 2016 to 2022. Mechanical ventilation is a life saving equipment; it helps patients suffering from respiratory disorders and even respiratory failure. Prevailing incidence of chronic disease such as asthma, bronchitis and others among patients is subjugated to the growing demand for mechanical ventilators. In addition to that, growing population of geriatric people who are prone to respiratory disorders is another key factor behind the growth of the market.

Critical care ventilators in product segment is estimated to have dominant market share on account of rising medical emergencies and increasing demand for critical patients management. Home Care in end-user segment is expected to grow at highest CAGR, attributing to the increase in Point of Care treatment. North American market is estimated to have dominant share in market among all regional segments; this is due to the huge amount of geriatric population present in this area and also due to the increasing death toll in this region.

Some of the key players of the Mechanical Ventilators market include Medtronic Plc, Becton, Dickinson and Company, CareFusion Corp, Dräger Medical, Inc., Fisher & Paykel Healthcare Corp. Limited, GE Healthcare, Getinge Group, Hamilton Medical AG, MAQUET GmbH & Co. KG, Medtronic Public Limited Company, Philips Healthcare, Resmed, Inc., Smiths Group PLC and Teleflex Incorporated.
