Abstracts

According to Statistics MRC, the Global Medical Imaging Workstations market is accounted for \$801.21 million in 2017 and is expected to reach \$2,010.92 million by 2026 growing at a CAGR of 10.8%. Factors such as rising adoption of medical imaging workstations, improved product commercialization and evolving user preference for digital platforms are fuelling the market growth. However, premium product pricing is hampering the market.

Based on modality, magnetic resonance imaging segment commanded significant growth during the forecast period due to the rising number of MRI (Magnetic Resonance Imaging) examinations and an increasing number of MRI examinations.

By geography, North America is expected to dominate the global market due to the increasing adaption of technologically advanced imaging systems, a strong presence of prominent market players in this region and high incidence/prevalence of various target diseases.
