## Abstracts

According to Statistics MRC, the Global Medium Voltage Cables Market is expected to grow from \$39.32 billion in 2016 to reach \$64.12 billion by 2023 with a CAGR of 7.2%. Some of the driving factors like hasty growth in industrialization & urbanization, high production of renewable energy and rising government policies to expand the T&D systems are contributing for the market growth. However, less financial support and delay in intricate planning & authorization of projects are limiting the market. On the other hand, growing demand for power and wind policies in emerging countries is providing a significant opportunity for the market.

On the basis of installation, underground segment is anticipated to lead the market across the globe due to continuous restoration of medium voltage cables & accessories. Moreover, by geography, Asia Pacific region is witnessed to grow at a faster rate due to rising renewable power generation in this region.
