Abstracts

According to Statistics MRC, the Global Metal Deactivator market is accounted for \$164.10 million in 2015 and is expected to reach \$250.52 million by 2022 growing at a CAGR of 6.2%. The use of copper, aluminum and other non-ferrous metals in wide spectrum had emphasized the need for additives to minimize negative effects as staining and corrosion. The dominant applications of metal deactivators, especially in the oilfields and refineries will boost the overall market growth. However, market is set to observe a stagnant growth owing to the quantity of its usage pertaining to its applications.

Refineries and metal working industries are the key end users of Metal Deactivator in industrial sector which are favouring the market. The factors increasing the demand of metal deactivators are, the rising number of passenger cars in Asia-Pacific and inflexible emission rules in regions such as America and Europe but thereafter Asia-Pacific is the fastest growing market for metal deactivators, owing to the continued growth in end user automotive industry.

Some of the major players in the global Metal Deactivator market include Innospec Inc., Songwon Industrial Co., Afton Chemical Corporation, Dorf Ketal India Pvt. Ltd., BASF SE, Adeka Corporation, Vanderbilt Chemicals, LLC, King Industries Inc., Clariant AG, LANXESS AG, Aditya Birla Chemicals Ltd., HPL additives, Ab Petrochem Pvt. Ltd. and Jayvee Organics & Polymers Pvt. Ltd.
