Abstracts

According to Statistics MRC, the Global Micro Mobile Data Center market is expected to grow from \$2.36 billion in 2016 to reach \$10.26 billion by 2023 with a CAGR of 23.3%. Some of the key factors fueling the market growth include rising demand for standardized infrastructure, increasing demand for green data centers and growing digital traffic. However, lack of awareness is one of the major factors restricting the market growth.

Micro-mobile data centers deliver quick and safe access to compute and data resources. These data centers even have continuous power supplies, fire protection, associated management tools, security systems, and in-built cooling systems. Therefore, these centers offer easy installation, are simple to use, and are also cost-effective. These micro-mobile data centers are useful in disaster prone regions and remote locations for even temporary deployments.

Depending on organization size, large enterprises are increasingly adopting micro mobile data center solutions, as these solutions maintain remote office management. This is anticipated to increase the market share during the forecast period. North America held the largest market and the trend is expected to continue during the forecast period due to the presence of a large number of data centers.

Some of the key players in global Micro Mobile Data Center market include Dell Inc., Huawei Technologies Co., Ltd. Hewlett Packard Enterprise Development LP, Panduit Corp., Schneider Electric SE, Eaton Corporation PLC, Hitachi, Ltd., International Business Machines Corporation, Instant Data Centers, LLC, Dataracks, Rittal GmbH & Co. Kg, Zellobox Pty Ltd., Vertiv Co., Canovate Group and AST Modular.
