According to Statistics MRC, the Global Military Antenna market is accounted for \$3.15 billion in 2017 and is expected to reach \$6.41 billion by 2026 growing at a CAGR of 8.2% during the forecast period. Rise in adoption of unmanned vehicles rise in military spending and Modernization Programs are some of the key factors influencing the market growth. However, high cost involved in the growth of military antennas and system requirements and design constraints are hindering the market growth.

An antenna is any device that converts electronic signals to electromagnetic waves (and vice versa) successfully with minimum loss of signals. Military antennas give highly accurate tracking, surveillance, ground mapping, warning against aircrafts, weapons, etc. thereby enhancing the security.

Amongst platform, ground platform segment commanded significant market share in the global market during the forecast period. It provides real time information related to ground penetration, unexploded tunnels during the war. By geography, Asia Pacific dominates the global market due to increasing defense expenditure of India and China, among others and expansion of military command in emerging economies.

Some of the key players in the global military antenna market include Hascall-Denke, MTI Wireless Edge, Shakespeare Electronic Products Group, Comrod, Antenna Products, Rami, Alaris Antennas, Terma, Rohde & Schwarz, Cobham and Harris.
