According to Statistics MRC, the Global Military Augmented Reality (AR) Headgear market is expected to grow with a CAGR of 12.0% during the forecast period. Pricey real-time military training and advancement of low-cost & lightweight AR headset are some factors favoring the market growth. Adding to this, the growing concern of militaries to set up the soldiers with modern smart devices will indirectly tender to the market growth. On the other side, an issue with AR headgears battery is the dominant restraint hindering the market growth because the performance and working of AR headgear deeply build upon the battery.

As of now, most VR/AR headgears weigh generally between four to six ounces. Industries of AR headgears are specifically concentrating to cut down the difficulties caused to the facial muscles in humans. Getting up side effects induced by VR/AR headsets have headed to the expansion and development of headgears. On geography basis, North America is expected to grab the largest share in global market. Moreover, U.S. is appearing as the prominent revenue generator to the market globally. It is likely to keep its commanding position during the forecast period.
