Abstracts

According to Statistics MRC, the Global Modular Data Center Market is accounted for \$11.15 billion in 2016 and is expected to reach \$58.25 billion by 2023 growing at a CAGR of 26.6% during the forecast period. Factors such as increased need for portable data centers and portability and scalability needs are fueling the market growth. However, limitations in high performance computing are hampering the market.

Individual functional module segment is anticipated to grow at a significant CAGR attributed to the benefits provided by the individual functional module. North America commanded the largest market share attributed to the large number of data centers across various industries in this region. Asia Pacific is expected to grow at a fastest CAGR owing to the rising data center traffic.

Some of the key players in Modular Data Center market include Schneider Electric SE, Elliptical Mobile Solutions, Commscope Holding Company, Inc., Huawei Technologies Co., Ltd., AST Modular, Rittal GmbH & Co. Kg, Hewlett Packard Enterprise Development Lp, Vertiv Co., Cisco Systems Inc., International Business Machines Corporation, Flexenclosure AB, Dell Inc., Baselayer Technology, LLC and Silicon Graphics International Corp.
