## **Abstracts**

According to Statistics MRC, the Global Mycoplasma Testing market is accounted for \$427.2 million in 2016 and is expected to reach \$911.7 million by 2022 growing at a CAGR of 13.5% from 2016 to 2022. Rising R&D investments in life sciences, increasing healthcare expenditure levels, increased number of patients suffering from infectious diseases, rapidly increasing new drug launches, increasing applications of PCR technologies in the field of life science, growing biotechnology & pharmaceutical companies, technological advancements and increasing government support are some of the factors favouring the mycoplasma testing market. However, stringent government regulations and high degree of consolidation for new entrants are hampering the market.

Polymerase Chain Reaction (PCR) technology is projected to witness substantial breakthrough advancements over the coming decade and is expected to provide lucrative avenues of growth. In 2016, kits & reagents products accounted for the largest market share due to repeated purchase of these products. Pharmaceutical and biotechnology companies hold the largest share in end users segment. Contract research organizations are anticipated to grow at a faster pace during the forecast period.

North America is the largest market for mycoplasma testing market due to increasing demand for fast, accurate and affordable diagnosis in healthcare. In addition, spending in R&D activities is expected to enhance developments and rising government funding for pharmaceutical and biotechnology sector in North America is also boosting the growth of mycoplasma testing markets. Asia Pacific is expected to witness fastest growth on account of rapidly increasing demand for advanced healthcare technologies, funding initiatives generated by the Indian government to promote R&D activities in

biopharmaceutical industries.

Some of the significant players in global mycoplasma testing market are Abbott, American Type Culture Collection, Beckman Coulter/Danaher, Becton Dickinson, Biological Industries, Israel Beit Haemek Ltd., Bionique Testing Laboratories, Inc., Charles River Laboratories International, Inc., InvivoGen, Lonza Group Ltd., Merck KGaA, Promo Cell GmbH, Qiagen, Roche, Sigma-Aldrich and Thermo Fisher Scientific, Inc.
