Abstracts

According to Statistics MRC, the Global Myeloproliferative Disorders Market is accounted for \$9976.1 million in 2026 and is expected to reach \$21855.9 million by 2034 growing at a CAGR of 10.3% during the forecast period. A class of uncommon blood diseases known as myeloproliferative disorders (MPDs) is defined by the bone marrow's overproduction of mature blood cells. Red blood cells, white blood cells, and platelets are among the cells that are impacted by this aberrant proliferation. Regular monitoring is crucial for disease management and to prevent potential progression to acute leukemia. The goals of management are to minimize symptoms, cut down on complications, and stop the condition from getting worse.

According to data from 2021 provided by the International Agency for the Research on Cancer, there were 4.79 million cancer cases in the European region in 2020, and that number is projected to rise to 6.07 million by 2040.

Market Dynamics:

Driver:

Rising demand in disease awareness

Myeloproliferative Disorders (MPDs) among the general public and healthcare professionals are detected by improving recognition of these conditions. Campaigns for education, healthcare initiatives, and advocacy are essential in spreading awareness and there is a corresponding increase in demand for innovative treatments and therapies. Thus, all things considered, increased awareness of the disease has a positive impact on the MPD by encouraging early intervention and enhancing the standard of care for those who are affected which is driving the market size.

Restraint:

High cost treatment

Governments and insurance companies might find it difficult to handle the financial strain of offering extensive and expensive treatments for myeloproliferative disorder (MPD). Patients and healthcare systems bear a financial burden due to the high costs of medications, therapies, and possible stem cell transplants potentially impacting their overall health outcomes. Therefore, the high cost of treatment serves as a significant restraint in the myeloproliferative disorder (MPD) market.

Opportunity:

Technological advancements in diagnosis

New developments in molecular profiling, imaging, and genetic testing improve the precision and efficacy of MPD diagnosis. Improved diagnostic skills also make it easier to intervene quickly, which slows the course of the illness and its consequences. In addition, continuous research and development in diagnostic technologies demonstrates a dedication in optimizing the diagnosis of myeloproliferative disorders, assisting medical professionals in making well-informed decisions, and therefore gradually driving market expansion.

Threat:

Genetic complexities in drug development

Drug development efforts face obstacles in identifying common molecular targets applicable across the genetic spectrum of MPDs. This complexity makes it challenging to develop universal targeted therapies, as each subtype may require a distinct

approach including mutations in JAK2, CALR, and MPL genes, leading to varied disease phenotypes. In addition, the development of curative therapies and ongoing research to intricate molecular mechanisms are decreased thereby hampering the segment expansion.

Covid-19 Impact

The pandemic has disrupted routine healthcare services, leading to delayed diagnoses and treatment initiation for many MPD patients, including conditions like polycythemia vera, essential thrombocythemia, and myelofibrosis, face heightened risks due to compromised immune systems and increased susceptibility to infections. Therefore, the market for myeloproliferative disorders faced difficulties as a result of these combined factors, which have an impact on patient care and market expansion overall.

The polycythemia vera (PV) segment is expected to be the largest during the forecast period

The Polycythemia Vera (PV) segment is estimated to hold the largest share. PV is characterized by a disorder of the bone marrow that can cause high blood viscosity, clotting, and cardiovascular problems. The goal of ongoing research is to create novel therapies that will help PV patients live better, manage their symptoms, and lower their risk of thrombosis. Thus, the myeloproliferative disorders market is characterized by a delicate balance between disease control and improving patients' overall well-being which is driving this segment expansion.

The bone marrow biopsy segment is expected to have the highest CAGR during the forecast period

The bone marrow biopsy segment is anticipated to have highest CAGR during the forecast period. It is a diagnostic process that is essential for determining abnormalities in cell production and evaluating the health of the bone marrow. They are crucial for learning about genetic mutations, cell morphology, and the course of myeloproliferative disorders. In addition, researchers are conducting experiments to improve biopsy methods and make better use of molecular insights, which will increase their diagnostic utility and help in developing better treatment plans for these conditions which are boosting this segment growth.

Region with largest share:

Asia Pacific commanded the largest market share during the extrapolated period owing to governments and healthcare organizations which work together in raising awareness, advance diagnostic skills, and guarantee access to cutting-edge treatments. Key players and key countries in the region, including China, Japan, and India, have witnessed a surge in research and development activities focused on innovative therapies for MPDs. Therefore, this has resulted in introducing advanced treatment options, including targeted therapies and stem cell transplantation which further propel the growth of the region.

Region with highest CAGR:

North America is expected to witness highest CAGR over the projection period, owing to sophisticated diagnostic tools that allow for accurate disease identification, like molecular testing and genetic profiling. These developments in big data analytics and artificial intelligence support more comprehensive knowledge of MPDs and customized treatment strategies. Moreover, people are turning to targeted therapies, such as Janus kinase (JAK) inhibitors, which increase treatment efficacy while minimizing side effects, which are driving the region's expansion.

Key players in the market

Some of the key players in the Myeloproliferative Disorders Market include Novartis AG, Teva Pharmaceutical Industries, AbbVie, Bristol Myers Squibb (BMS), Roche, Incyte Corporation, Gilead Sciences, MP Biomedicals, Mylan, Roxall Medizin, AOP Orphan Pharmaceuticals AG, CTI BioPharma Corp, Promedior, Inc. and Celgene.

Key Developments:

In October 2023, Allergan Aesthetics, an AbbVie company announced positive topline results from two pivotal Phase 3 clinical studies evaluating trenibotulinumtoxinE for the treatment of moderate to severe glabellar lines.

In September 2023, Ionis Pharmaceuticals, Inc. announced that it has entered an agreement with Roche for two undisclosed early-stage programs for RNA-targeting investigational medicines for the treatment of Alzheimer's disease (AD) and Huntington's disease (HD).

In August 2023, Halozyme Therapeutics, Inc. announced the approval of Roche's Tecentriq® SC (atezolizumab), using Halozyme's ENHANZE® drug delivery technology,

by the Medicines and Healthcare Products Regulatory Agency in Great Britain.

In July 2023, DTx Pharma, a preclinical stage biotechnology company addressing the delivery challenges of oligonucleotide therapeutics with its Fatty Acid Ligand Conjugated OligoNucleotide (FALCON™) platform, announced that it has been acquired by Novartis.

Types Covered:

Polycythemia Vera

Chronic Myeloid Leukemia (CML)

Primary Myelofibrosis

Essential Thrombocythemia

Other Types

Diagnosis and Screening Methods Covered:

Bone Marrow Biopsy

Blood Tests

Genetic Testing

Treatment Options Covered:

Bone Marrow Transplant

Therapeutic Procedures

Supportive Care

Medications

Chemotherapy

Other Treatment Options

End Users Covered:

Pharmaceutical Companies

Research Institutions

Hospitals and Clinics

Other End Users

Regions Covered:

North America

US

Canada

Mexico

Europe

Germany

UK

Italy

France

Spain

Rest of Europe

Asia Pacific

Japan

China

India

Australia

New Zealand

South Korea

Rest of Asia Pacific

South America

Argentina

Brazil

Chile

Rest of South America

Middle East & Africa

Saudi Arabia

UAE

Qatar

South Africa

Rest of Middle East & Africa

What our report offers:

Market share assessments for the regional and country-level segments

Strategic recommendations for the new entrants

Covers Market data for the years 2023, 2024, 2025, 2026, 2027, 2028, 2030, 2032 and 2034

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

2 PREFACE

- 2.1 Abstract
- 2.2 Stake Holders
- 2.3 Research Scope
- 2.4 Research Methodology
 - 2.4.1 Data Mining
 - 2.4.2 Data Analysis
 - 2.4.3 Data Validation
 - 2.4.4 Research Approach
- 2.5 Research Sources
 - 2.5.1 Primary Research Sources
 - 2.5.2 Secondary Research Sources
 - 2.5.3 Assumptions

3 MARKET TREND ANALYSIS

- 3.1 Introduction
- 3.2 Drivers
- 3.3 Restraints
- 3.4 Opportunities
- 3.5 Threats
- 3.6 End User Analysis
- 3.7 Emerging Markets
- 3.8 Impact of Covid-19

4 PORTERS FIVE FORCE ANALYSIS

- 4.1 Bargaining power of suppliers
- 4.2 Bargaining power of buyers
- 4.3 Threat of substitutes
- 4.4 Threat of new entrants
- 4.5 Competitive rivalry

5 GLOBAL MYELOPROLIFERATIVE DISORDERS MARKET, BY TYPE

- 5.1 Introduction
- 5.2 Polycythemia Vera
- 5.3 Chronic Myeloid Leukemia (CML)
- 5.4 Primary Myelofibrosis
- 5.5 Essential Thrombocythemia
- 5.6 Other Types

6 GLOBAL MYELOPROLIFERATIVE DISORDERS MARKET, BY DIAGNOSIS AND SCREENING METHODS

- 6.1 Introduction
- 6.2 Bone Marrow Biopsy
- 6.3 Blood Tests
- 6.4 Genetic Testing

7 GLOBAL MYELOPROLIFERATIVE DISORDERS MARKET, BY TREATMENT OPTION

- 7.1 Introduction
- 7.2 Bone Marrow Transplant
- 7.3 Therapeutic Procedures
- 7.4 Supportive Care
- 7.5 Medications
- 7.6 Chemotherapy
- 7.7 Other Treatment Options

8 GLOBAL MYELOPROLIFERATIVE DISORDERS MARKET, BY END USERS

- 8.1 Introduction
- 8.2 Pharmaceutical Companies
- 8.3 Research Institutions
- 8.4 Hospitals and Clinics
- 8.5 Other End Users

9 GLOBAL MYELOPROLIFERATIVE DISORDERS MARKET, BY GEOGRAPHY

- 9.1 Introduction
- 9.2 North America

- 9.2.1 US
- 9.2.2 Canada
- 9.2.3 Mexico
- 9.3 Europe
 - 9.3.1 Germany
 - 9.3.2 UK
 - 9.3.3 Italy
 - 9.3.4 France
 - 9.3.5 Spain
 - 9.3.6 Rest of Europe
- 9.4 Asia Pacific
 - 9.4.1 Japan
 - 9.4.2 China
 - 9.4.3 India
 - 9.4.4 Australia
 - 9.4.5 New Zealand
 - 9.4.6 South Korea
 - 9.4.7 Rest of Asia Pacific
- 9.5 South America
 - 9.5.1 Argentina
 - 9.5.2 Brazil
 - 9.5.3 Chile
 - 9.5.4 Rest of South America
- 9.6 Middle East & Africa
 - 9.6.1 Saudi Arabia
 - 9.6.2 UAE
 - 9.6.3 Qatar
 - 9.6.4 South Africa
 - 9.6.5 Rest of Middle East & Africa

10 KEY DEVELOPMENTS

- 10.1 Agreements, Partnerships, Collaborations and Joint Ventures
- 10.2 Acquisitions & Mergers
- 10.3 New Product Launch
- 10.4 Expansions
- 10.5 Other Key Strategies

11 COMPANY PROFILING

- 11.1 Novartis AG
- 11.2 Teva Pharmaceutical Industries
- 11.3 AbbVie
- 11.4 Bristol Myers Squibb (BMS)
- 11.5 Roche
- 11.6 Incyte Corporation
- 11.7 Gilead Sciences
- 11.8 MP Biomedicals
- 11.9 Mylan
- 11.10 Roxall Medizin
- 11.11 AOP Orphan Pharmaceuticals AG
- 11.12 CTI BioPharma Corp
- 11.13 Promedior, Inc.
- 11.14 Celgene
