Abstracts

According to Statistics MRC, the Global Night Vision Device market is expected to grow from \$6.74 billion in 2016 to reach \$12.24 billion by 2022 with a CAGR of 10.4%. Growing concern for nation security, cheaper devices when compared to thermal imaging devices and raising adoption of night vision device from military & defense sectors are the major factors fuelling the market growth. Furthermore, recent technological developments of night vision devices are another factor bolstering the market. On the other hand, high manufacturing cost is hindering the market growth.

Amongst devices, Night vision goggle segment acquired the largest market share during the forecast period. The growth is due to the increasing adoption from military & defense segments. North America leads the night vision devices market during the forecast period. On the other hand, Asia Pacific is anticipated to grow at the highest CAGR during the forecast period. This growth is attributed to increasing developing countries nation security budgets.
