## Abstracts

According to Statistics MRC, the Global Non-Honeycomb Sandwich Panel Core Materials market is accounted for \$643.7 million in 2016 and is expected to reach \$1,021.3 million by 2023 growing at a CAGR of 6.8% from 2016 to 2023. Rising demand for lightweight materials from end use industries is primarily favouring the non-honeycomb sandwich panel core materials market. Furthermore, growing use of composites in aerospace industry, increasing demand from verticals such as construction, marine and wind energy for structural application, rising need for sustainability in materials and recovery of North American marine industry from economic recession are the factors enhancing market growth. However, complexity in manufacturing process is expected to restrain the market growth.

Wind Energy segment hold the largest share in non-honeycomb sandwich panel core materials end user market. Aerospace industry is anticipated to grow at a faster pace during the forecast period due to its wide range of applications such as ceilings, walls, overhead bins and aircraft cabin floor. Asia Pacific is anticipated to be the largest market, followed by North America and Europe.
