Abstracts

According to Statistics MRC, the Global Nutraceutical Ingredients Market is accounted for \$31.66 billion in 2017 and is expected to reach \$65.98 billion by 2026 growing at a CAGR of 8.5% during the forecast period. Growing dispersion of unceasing diseases and rising concern regarding longer life span are the key factors fuelling market growth. The high cost of the ingredients may be the concern and hinder the growth of the market.

The nutraceutical is any substance considered as food or part of food which provides the nutritional worth to the diet. The nutraceutical is also a blend of nutrition and pharmaceuticals. Nutraceutical has a variety of returns such as it provides the nutritional supplements to the body through diet and works for the deterrence of diseases.

By application, functional beverages segment are projected to witness the major growth rate in the future, when compared to the other applications. In order to maintain good health and reduce the risk of illnesses, people are increasingly looking to adopt healthy lifestyles and diets. This has increased the demand for functional beverages. The expansion prediction of ingredients in the ingredient application market is expected to augment proportionally, with the wider applications of ingredients in the functional beverages sector.

On the basis of geography, the Asia-Pacific region dominates the market with a maximum growth rate. Customer preferences for functional foods and beverages have been one of the main factors driving the growth of the market in this region. Developing nations like India, China, etc are likely to witness huge growth for the market over the forecast period.
