Abstracts

According to Statistics MRC, the Global Occupancy Sensors Market is accounted for \$1.90 billion in 2020 and is expected to reach \$5.93 billion by 2028 growing at a CAGR of 15.3% during the forecast period. Factors such as rising penetration of energy efficient devices, increasing number of smart homes, and growing demand for energy-efficient devices are driving the market growth. However, inconsistency issues associated with the wireless network systems is hampering the growth of the market.

Occupancy sensors are used for automatically turning the lights on and off when people enter or leave a location. These products help in energy savings in residential as well as commercial applications.

Based on the end user, the non-residential buildings segment is anticipated to expand at a rapid pace during the forecast period which can be attributed to the growing awareness of home automation and smart homes among occupants. By geography, North America is going to have high growth during the forecast period owing to the well organized and well managed value chain in the region which simplifies the overall ordering and installation process.

Some of the key players profiled in the Occupancy Sensors Market include Honeywell, Schneider Electric, Johnson Controls, Osram Licht AG, Eaton, Siemens, Texas Instrument, Enerlites Inc, Leviton Manufacturing, Signify, Bruck Electronic GmbH (B.E.G), Hager Group, Crestron Electronics, Hubbell Incorporated, Lutron Electronics, Pyrotech-Tempsens Group, and Alan Manufacturing Inc.
