Abstracts

According to Statistics MRC, the Global Optical Ceramics Market is accounted for \$134.88 million in 2018 and is expected to reach \$476.89 million by 2027 growing at a CAGR of 17.1% during the forecast period. Growing usage in aerospace industry and increasing defence expenditure on advanced materials and technologies are the driving factors influence the market growth. However, huge cost of optical ceramics may hinder the growth of the market.

Optical ceramics may be defined as transparent polycrystalline materials that could be used in place of single crystal scintillators. The advantage of optical ceramics is the possibility of production of reasonably priced and large sized materials for large area detection. Optical ceramics are replacing glass, plastics and metals at a rapid pace and thus, catching the world's attention.

By Material, Sapphire segment has a growing prominence due to growing demand in medical applications, easy availability and presence of a large number of manufacturers of this material. By geography, Asia Pacific is going to have a lucrative growth during the forecast period due to the rising manufacturing sector and low-cost labor in this region.

Some of the key players in Optical Ceramics Market include Ceramtec, Schott AG, Murata, Kyocera, Advanced Ceramic Manufacturing, II-VI Optical Systems, Surmet Corporation, Coorstek, Konoshima Chemicals, Saint-Gobain, Blasch Precision Ceramics, Mcdanel Advanced Ceramic Technologies , Siccas , Cilas, Rayotek Scientific Inc. and Applied Ceramics.
