## Abstracts

According to Statistics MRC, the Global Package Boilers Market is expected to grow from \$8.41 billion in 2016 to reach \$12.35 billion by 2023 with a CAGR of 5.6%. Growing demand from the food & beverage industry is projected to positively influence the global package boilers market over the forecast period. Growing preference for clean and renewable energy sources is expected to assist the global market growth. Furthermore, growing non-renewable power plants, development of ultra-mega power projects in emerging countries and government initiatives towards reducing dependency on fossil fuels are the factors touted to bolster the global package boilers market growth over the forecast period. Strict emission standards are expected to hamper the overall market growth.

Food & Beverage segment leads the market globally with the biggest market share and is expected to grow with a high CAGR among the other verticals. The growth of this segment is attributed to the increase in automation and upgrading processes in F&B industry, rising expenditure in the F&B processing industry, rising demand for processed foods and growing disposable income in developing countries. Based on type, the fire-tube package boilers segment is anticipated to lead the package boilers market from 2017 to 2023 because of its wide usage in many process industries and marine applications.

North America and Europe have dominated the global package boilers market and accounted for the major market share. Regulations imposed by the major environmental regulatory bodies such as the US Environmental Protection Agency encourages various end use industries, which is fuelling the demand for package boilers in these regions. Asia Pacific is expected to witness a brisk market growth over the forecast period. Growing demand for package boilers from various end-use industries, rapid industrialization, continued economic growth and infrastructural developments in APAC are the factors expected to have positive impact on the overall regional market.

Countries such as India, China, Brazil, Mexico, South Korea and Japan are estimated to witness rapid growth over the forecast period.
