According to Statistics MRC, the Global Packaging Machinery Market is accounted for \$31.5 billion in 2015 and is expected to reach \$48.15 billion by 2022 growing at a CAGR of 6.25% from 2015 to 2022. The factors such as rising advancements in modular packaging machines, growing accessibility of packaged foods, multipacks and increasing adoption of automatic machines in multiple sectors are some of the drivers favoring the market growth. However, lack of awareness among consumers will change the growth of innovative packaging methods. Furthermore, more number of technological advancements should attract the consumers and intensified competition from small vendors are the major challenges in packaging machinery market growth.

Labelling & Coding machine segment is expected to grow at the highest CAGR in terms of revenue due to the growing demand for pharmaceutical, food and beverage manufacturers to guarantee the safety of their products throughout the supply chain. However, Form Fill Seal (FFS) machinery will remain as the most widely used type of packaging equipment due to their extensive use in their large food processing market. Asia Pacific leads the global market during the forecast period owing to increasing shares for global sales and growing innovations in technologically complicated equipments.
