According to Statistics MRC, the Global Pea Starch Market is accounted for \$83.80 million in 2017 and is expected to reach \$178.87 million by 2026 growing at a CAGR of 8.8% during the forecast period. Rise in demand for convenience food and increase in the production of pea are driving the market. The lack of awareness regarding the amazing benefits of the pea starch is restraining the market.

Pea starch is the starch solution that is extracted from the peas. Pea starch is often used as thickening solution and to create gel like mixture as it has a rich source of amylase.
