Abstracts

According to Statistics MRC, the Global Pediatric Ultrasound Market is accounted for \$275.30 million in 2016 and is expected to reach \$420.71 million by 2023 growing at a CAGR of 6.2% during the forecast period. Factors such as increase in occurrence of pediatric chronic heart disorders and technological advancements in ultrasound devices are fueling the market growth. However, lack of skilled workforce and limitations of ultrasound imaging are restraining the market.

The use of ultrasound devices for cardiology examinations is continuously increasing for adolescents, which makes it the fastest growing segment. Asia Pacific contributed the highest revenue to the overall market in the recent past and is expected to be the fastest growing region over the fastest period. In this region, healthcare reforms for wider reach, high incidence of pediatric cardiac diseases, and unmet healthcare needs in developing countries such as China and India are favoring the growth of this market.

Some of the key players in Pediatric Ultrasound market include Siemens AG, Hitachi, Ltd., Analogic Corporation, Fujifilm Corporation, Mindray Medical International Limited, General Electric Company, Samsung Medison Co., Ltd., Koninklijke Philips N.V., Esaote SpA and Toshiba Corporation.
