Abstracts

According to Statistics MRC, the Global Pediatric Vaccines market is estimated at \$XX million in 2015 and is expected to grow at a CAGR of XX% to reach \$XX million by 2022. Rising government and non-government financial support for development of vaccine is the major driver for the pediatric vaccine market. Increasing innovative technologies such as therapeutic and adjuvant vaccines are anticipated to fuel the pediatric vaccine market during the forecast period. Moreover, increasing expenditure of vaccines, little accessibility to remote areas and strict regulation for approval of vaccines are some of the factors hampering the global pediatric vaccine market.

Infectious diseases segment is expected to grow at a faster rate during the forecast period. North America dominates the global market for pediatric vaccines followed by Europe. Moreover, the Asia Pacific is likely to report the highest CAGR during the forecast period, driven by the high birth rate in China and India.

Some of the key players in the market include Johnson and Johnson, Abbott Laboratories, Baxter International, Eli Lilly and Company, Sanofi S.A, Novo Nordisk A/S, Bharat Biotech International Limited, Actelion Pharmaceuticals Ltd, Genentech, Inc., Shire Pharmaceuticals Group Plc, Merck & Co. Inc, Bristol-Myers Squibb Company, Amgen Inc., Novartis AG and Boehringer Ingelheim GmbH.
