According to Statistics MRC, the Global Perforating Gun Market is accounted for \$5,361.35 million in 2020 and is expected to reach \$8,359.93 million by 2028 growing at a CAGR of 5.7% during the forecast period. Growing complexity of reservoir conditions and increased shale gas exploration is driving the market growth. However, declining number of newly drilled wells is hampering the growth of the market.

Perforating gun is a device used to drill holes in oil and gas wells for production purpose. The primary purpose of the perforating gun is to provide effective flow communication between the cased wellbore and the productive reservoir.

Based on the well type, the horizontal & deviated well segment is going to have lucrative growth during the forecast period due to the increasing well development activities and increasing reperforation of old wells. By geography, North America is going to have high growth during the forecast period owing to the rise in shale gas exploration activities and commencement of several offshore drilling activities in the region.

Some of the key players profiled in the Perforating Gun Market include Baker Hughes, Core Laboratories, Dynaenergetics , Halliburton, Hunting PLC, National Oilwell Varco , Oiltech Service , Promperforator, Schlumberger, Shaanxi Fype Rigid Machinery , Tassaroli, Weatherford, Yellow Jacket Oil Tool , and Zao Ntf Perfotech.
