Abstracts

According to Statistics MRC, the Global Perimeter intrusion detection systems market is accounted for \$9.45 billion in 2017 and is expected to reach \$39.12 billion by 2026 growing at a CAGR of 17.1% during the forecast period. Increasing installations of video surveillance for security systems, increase in adoption of modern technologies such as microwave sensors, infrared sensors, radar sensors & fiber-optic sensors, the increasing risk of terrorism & infiltration and significant reduction in manpower cost are some of the key factors fueling the market growth. However, factors such as high installation and maintenance costs are restricting the market.

Perimeter intrusion detection systems are built by using sensors and a variety of other instruments that give protection to the consumers by helping them to recognize the intrusions in their perimeter and property in time for action and assessment. Primarily perimeter intrusion system was used to protect intrusions in military applications, critical infrastructure and in high risk sites. System integration is adopted to improve overall performance of perimeter intrusion detection system in terms of efficiency, accuracy and size.

Amongst deployment type, open area segment held significant market share due to growing demand for Perimeter intrusion detection systems from the shipping sector facilitates the deployment of security solutions in open areas, such as railways and airports. Open area systems are provided with volumetric sensors. These sensors typically cover large areas and offer volumetric protection by detecting the motion of the intruder within the protected space. By geography, North America acquired the largest market share during the forecast period. The growth of the market in the region can be attributed to the vital need for security against the terrorist activities and the huge budget that is allocated by the governments for the defence sector.

Some of the key players profiled in the Perimeter intrusion detection systems market include Flir Systems, Jacksons Fencing, Southwest Microwave, UTC Climate, Controls & Security, Honeywell International Inc, Schneider Electric, Future Fibre Technologies, CIAS Elettronica Srl, Johnson Controls, Rbtec Perimeter Security Systems, Advanced Perimeter Systems, Anixter, Fiber Sensys, Detekion Security Systems and Sorhea.

What our report offers:

Market share assessments for the regional and country level segments

Market share analysis of the top industry players

Strategic recommendations for the new entrants

Market forecasts for a minimum of 9 years of all the mentioned segments, sub segments and the regional markets

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements
