According to Statistics MRC, the Global Periodontal Therapeutics Market is valued at \$259.34 million in 2016 and is expected to reach \$511.76 million by 2023 growing at a CAGR of 10.2% from 2016 to 2023. Owing to increasing pool of diabetic patients will raise the Periodontal Therapeutics market growth. In addition, rising prevalence of periodontal disorders and the surging research activities for technological advancements in therapeutics are some factors positively impacting the growth. On the other hand, lack of favourable reimbursement policies in various countries across the world may limit the growth of this market.

Asia Pacific region is expected to grow at a higher CAGR during the forecast period owing to its population growth.
