Abstracts

According to Statistics MRC, the Global Plastic Waste Management Market is accounted for \$33.61 billion in 2020 and is expected to reach \$50.03 billion by 2028 growing at a CAGR of 5.1% during the forecast period. Rising awareness about health & environment, government implementing strict regulations regarding plastic disposal and management and recycling of toxic materials are the factors driving the market growth. However, the absence of an essential framework for segregation and collection of plastic waste material and lack of a skilled workforce are factors restraining the growth of the market.

Plastic waste management includes different strategies and methods in order to reprocess and reuse products made out of plastic, which is otherwise considered waste. Instead of dumping this plastic waste into water bodies, and landfills, and pollute the environment further, the plastic in these products can be recycled and put to use for another purpose or application and the recycled plastic is used in manufacturing new products.

Based on the service, the landfills segment is going to have lucrative growth during the forecast period due to the presence of fewer recycling plants and incinerators leads to mismanagement of waste, contributing to the rise in landfills and plastic waste disposals.

By geography, Asia Pacific is going to have high growth during the forecast period due to the growing population, rising GDP, and increasing disposable income in the Asia Pacific are leading to the generation of more solid waste including plastic waste, which, in turn, is creating opportunities for the market in the region. Infrastructural development in under-developed and developing countries of the Asia Pacific region drives the

growth of various methods of plastic waste management.

Some of the key players profiled in the Plastic Waste Management Market include Veolia Environnement S.A., SUEZ Environnement Company, Waste Management Inc. , Republic Services Inc., Hawkvale Limited, Progressive Waste Solutions Ltd., United Plastic Recycling, Inc., Covanta Holding Corporation, Luxus Limited, Hahn Plastics Limited, Biffa, Clean Harbors , Remondis International GmbH.
