Abstracts

According to Statistics MRC, the Global Polymeric Sand Market is accounted for \$69.56 million in 2020 and is expected to reach \$190.22 million by 2028 growing at a CAGR of 13.4% during the forecast period. The increasing preference for premium households with spacious outdoor and huge capital investments are driving the market growth. However, the lack of product awareness in developing countries is hampering market growth.

Polymeric sand is a combination of fine sands & polymers. When these mixtures are dispersed in water form a robust binding that locks sand particles. It is particularly used in concrete pavers, stone pavers, and brick pavers for filling the joints between them.

Based on the product, the polymeric sand segment is going to have lucrative growth during the forecast period due to its extensive usage in joining pavements for driveways, footpaths, and other auxiliary spaces along roads.

By geography, Asia Pacific is going to have high growth during the forecast period due to the rise in per capita income of the population. The demand for bungalows and row houses with swimming pools, lawns, patios, etc. is bolstering in the region.

Some of the key players profiled in the Polymeric Sand Market include Alliance Designer Products Inc, Ash Grove Packaging, Fairmount Santrol, Promasonry, Sable Marco Inc, Sakrete Inc, Sale Marco, SEK Surebond Inc , Silpro, SRW Products, TCC Materials, Techniseal, Unilock, and Vimark Srl .
