According to Statistics MRC, the Global Pressure pumping Market is valued at \$76.23 billion in 2015 and is expected to grow at a CAGR of 16.66% to reach \$224.27 billion by 2022. Rising energy demand across the globe, growing drilling activities for extraction of oil and gas are some of the major factors fueling the market growth. Moreover, shift towards oil drilling activities by exploration and production companies due to declining natural gas prices is anticipated to propel the market growth.
