Abstracts

According to Statistics MRC, the Global Process Analyzer Market is accounted for \$6.00 billion in 2020 and is expected to reach \$9.70 billion by 2028 growing at a CAGR of 6.2% during the forecast period. Increasing use of process analyzers in drug safety, fiscal policy measures by regional financial institutions, and rising demand for water & wastewater treatment are the major factors propelling the market growth. However, lack of skilled professionals and high infrastructure cost are hampering the market growth.

Process analyzers are automatic devices adapted to their environment and conceived for the continuous or periodical measurement of one or more physical or chemical parameters along an industrial process line. Process analysis can help identify critical process parameters (CPPs) and critical quality attributes (CQAs) to ensure that the result is quality by design (QbD). Process analysis will use different testing methods based on which parameters are being analyzed.

Based on gas analyzer, the oxygen analyzer segment is going to have a lucrative growth during the forecast period owing to the increase in adoption of the oxygen analyzers across various process industries, especially pharmaceutical and petrochemical, to determine the amount of oxygen in boilers, incinerators, and furnaces; such analyzers provide fast and accurate readings in high temperatures and corrosive atmospheres..

By geography, North America is going to have a lucrative growth during the forecast period due to the rising technological enhancements and growing adoption of process analyzers in oil & gas industries in the region. Additionally, the growing application areas of process analyzers across different industry verticals such as pharmaceuticals, water & wastewater, power generation, and food & beverages among others is another major factor driving the growth of the process analyzer market in the region.

Some of the key players profiled in the Process Analyzer Market include ABB Ltd, Advanced CAE, AMETEK Process Instruments, Applied Analytics, Inc, Cemtrex, Emerson Electric Co., Endress+Hauser AG, Hach Lange GmbH, Honeywell International, Inc, Labcompare, Mettler-Toledo International Inc, Modcon Systems, Siemens AG, Suez, Teledyne Technologies, Inc, Thermo Fisher Scientific, Inc, and Yokogawa Electric Corp.
