Abstracts

According to Statistics MRC, the Global Pyrethrin Market is expected to grow at a CAGR of 6.4% from 2017 to 2026. Rising demand for hygienic products by households, increasing global population and rising lifestyle are some of the key factors boosting the market growth. However, environmental and health-related regulations and Pyrethrins sensitivity towards sunlight, heat, and moisture is restricting its use in agricultural sector are hampering the growth of market.

Pyrethrins are a set of natural insecticides that are derived from dried flowers of pyrethrum daisy (*Chrysanthemum cinerariaefolium*). As pyrethrins are biodegradable and have minimal impact on human health and environment, they are preferred over conventional insecticides such as organochlorides and organophosphates. Pyrethrin is prepared by industrial methods synthetically and may also occur naturally in chrysanthemum flowers. It is often considered as an organic insecticide as it occurs naturally in nature. Pyrethrin primarily targets the nervous system of the insects.

Based on Product, Pyrethrin 0.2 is natural organic compounds with potent insecticidal activity. It is an ester of (+)-Trans-chrysanthemic acid with (S)-(Z)-pyrethrolone. The growth of this segment in the market is due to the huge figure of chemical segregations that is included in this type of pyrethrin.

Asia Pacific is the fastest growing region in the market during the forecast period. The growth is due to increasing population and a growing industrial belt in this region. Moreover, North America is dominating the market among all the regions due to huge presence of industries in this region.

Some of the key players in the Pyrethrin Market are Horizon Sopyrwa, KAPI Limited, McLaughlin Gormley King Company, Valent BioSciences Corporation, Inclair Animal & Household Care Ltd, Agropharm Limited, W. Neudorff GmbH KG, Elanco, Beaphar UK,
