According to Statistics MRC, the Global Refurbished Medical Equipment market is accounted for \$5.5 billion in 2015 and is expected to reach \$13.9 billion by 2022 growing at a CAGR of 14.21% from 2015 to 2022. Growing demand for advanced medical devices in healthcare sector is the major driver favoring the market growth. The factors such as rising demand for large sum of investment in diagnostic equipment, growing vast supply of old medical devices for development, high cost expenditure pressures on healthcare organizations and friendliness environment developments are some of the factors driving the market growth. However, lack of knowledge in refurbished equipment, unwillingness to purchase refurbished devices and uncooperative association among end users are some of the factors limiting the market growth. Growing number of diagnostic centers & hospitals and vast requirement for refurbished equipment in emerging markets will remains as a biggest opportunity for the market growth over the forecast period.

North America dominated global market due to increasing aging population, huge prevalence of various diseases (such as cancer and CVD), favorable regulatory scenario for sale and failing insurance reimbursements for imaging procedures are driving the growth of the refurbished medical equipment market in the North American region. Asia-Pacific market is expected to grow at the highest CAGR due to the growing privatization of the healthcare sector, reduced reimbursement scenario, enormous patient population base, and occurrence of a large number of low budget hospitals/clinics.
