## **Abstracts**

According to Statistics MRC, the Global Retail Clinics Market is accounted for \$4,139.85 million in 2020 and is expected to reach \$10,397.48 million by 2028 growing at a CAGR of 12.2% during the forecast period. Rapid increasing numbers of retail clinics, higher ease of accessibility, and relatively lesser costs are driving the market growth. However, disinclination among general population for treatment in retail clinics and inadequate infrastructure for retail clinics are hampering the growth of the market.

Retail clinics or walk-in clinics also known as urgent care clinics are the alternative treatment sites that deliver care from a qualified provider in settings outside of the emergency department or traditional office. Retail clinics provide primary healthcare services across departmental stores, supermarkets, and retail stores. These retail clinics are gaining immense popularity as they are highly beneficial for public health, easily accessible, and also help in reducing the pressure on public healthcare services.

Based on the mode of payment, the insurance segment is going to have lucrative growth during the forecast period owing to the improving coverage and reimbursement policies, expanding coverage of public health insurance and active government support in ensuring affordable and accessible healthcare to all.

By geography, Asia Pacific is going to have high growth during the forecast period due to the rapid growing population and improving efforts to cut down the pressure on hospitals, and growing focus on outpatient care are some of the key factors for the

development of Asia Pacific market.

Some of the key players profiled in the Retail Clinics Market include The Kroger Co., Walmart Inc., Walgreens co., Nextcare Holdings, Inc., MedExpress, Doctors care, Bellin Health Systems, Concentra, Inc., CVS Health's MinuteClinic, NEXtCARE, Urgent Care MSO, Rite Aid, RediClinic LLC and U.S. HealthWorks.
