Abstracts

According to Statistics MRC, the Global Rubber Gloves Market is accounted for \$2.214 billion in 2017 and is expected to reach \$4.985 billion by 2026 growing at a CAGR of 9.4% during the forecast period. Increasing healthcare expenditure, growing ageing population, rising incidences of pandemic diseases and technological up-gradation are some of the factors propelling the market growth. However, fluctuating prices of key raw materials and natural gas tariff hike are hampering the market growth.

Amongst material, natural segment is held considerable market share during the forecast period. Natural rubber latex has consistently been the most satisfactory raw material for the manufacture of gloves. Certain latex proteins, carried over into the finished product by inadequate manufacturing processes, may pose a risk of provoking allergic reactions in some patients and medical workers. By geography, Asia Pacific region is expected to register the highest market growth rate during the forecast period due to growing healthcare infrastructure in emerging countries such as China and India along with booming medical tourism industry.

Some of the key players profiled Rubber gloves market include Honeywell International Inc, Hartalega Holdings Berhad, Longcane Industries Sdn. Bhd, Kossan Rubber Industries, Top Glove Corporation, Riverstone Holdings Limited, Rubberex, Supermax Corporation Berhad, Cardinal Health, Towa Corporation, Latexx Partners Berhad, Ansell, YTY Group, Sempermed, Comfort Rubber Gloves Industries, Kanam Latex, Dengsheng, Haojie, DPL and MCR Safety
