## Abstracts

According to Statistics MRC, the Global Sack Kraft Paper market is expected to grow from \$8.91 billion in 2016 to reach \$11.35 billion by 2023 with a CAGR of 3.5%. The factors that are expected to favor the market include printability, porosity, extensibility and durability. Moreover, rising demand for sustainable packaging with eco-friendly materials and value added significance across end-use industries are some trends enhancing the market. However, high cost of raw materials (soft wood) is a major restraint restricting the market size over the forecast period.

Cement segment is anticipated to exhibit highest CAGR as compared to other end user industries. This cement segment is a booming sector in developing economies such as Middle East, Asia and Africa. By geography, Asia Pacific dominated the global market and generated higher revenue share of around 36% in 2016.
