## Abstracts

According to Statistics MRC, the Global Accounts Payable Automation Market is accounted for \$1.34 billion in 2018 and is expected to reach \$3.58 billion by 2027 growing at a CAGR of 11.5% from 2018 to 2027. Growing developments in the agility of business process without giving up security is one of the key driving factors for the market growth. However, continuous changing requirements in business are inhibiting the market growth.

Security Policy Management is the process of identifying, implementing, and managing the rules and procedures that all individuals must follow when accessing and using an organization's IT assets and resources. A security policy must be tailored to meet organization's needs and flexible enough to address the new ways users want to access and transfer data.

On the basis of Product, Network Policy Management segment has a growing prominence due to growth in cyber attacks and concern over data security. Network policy management is a centralized platform to manage, implement, document and automate to ensure a secured and properly managed network system. By geography, North America is going to have a lucrative growth during the forecast period owing to the early adoption of these solutions in this region.

Some of the key players in this market include Tufin Software Technologies Ltd. , Sophos Ltd, Palo Alto Networks, Inc., Micro Focus, McAfee, Juniper Networks , IBM Corporation, HPE Development LP, Hewlett Packard Enterprise Development LP, Forcepoint LLC , FireMon, LLC., Cisco Systems, Check Point Software Technologies Ltd and AlgoSec Inc.
