Abstracts

According to Statistics MRC, the Global Sheep Milk Market is accounted for \$5,888.22 million in 2020 and is expected to reach \$9,456.00 million by 2028 growing at a CAGR of 6.1% during the forecast period. Surge in disposable incomes, favourable government initiatives and rising investment in research & development are driving the market growth. However, availability of alternatives at low cost is hampering the growth of the market.

Sheep milk is also referred to as ewe's milk, which is obtained from domestic sheep. There are a certain sheep breeds which are particularly reared for its wool and further for its meat and milk. However, there are a few specialized breeds that are utilized for the purpose of commercial dairy products owing to their high yield and long lactating periods. Sheep milk is preferred owing to its digestibility and acceptability to the human digestive system. It is a healthy alternative to cow and goat milk as it has antiallergic properties and is resistant to certain diseases.

Based on the category, the conventional segment is going to have lucrative growth during the forecast period as they are used by the majority of dairy farmers for milk delivery as it is more economical. Furthermore, conventional category is one of the most popular categories owing to its price and ease of availability.

By geography, Asia Pacific is going to have high growth during the forecast period which could be attributed to the steady rise in disposable incomes and growing

urbanization in the region, creating ample opportunities for key market players to be established in the region.

Some of the key players profiled in the Sheep Milk Market include Alimenta, Haverton Hill Creamery, Maui Milk Ltd., New Zealand Sheep Milk Company, Origin Earth, PremiBrebis, Roquefort Vernieres, Sheep Milk Company Ltd., Spring Sheep and Velvet Cloud.
