## Abstracts

According to Statistics MRC, the Global Smart Gas Meter (Intelligent Gas Meter) Market is accounted for \$1.91 billion in 2020 and is expected to reach \$3.21 billion by 2028 growing at a CAGR of 6.7% during the forecast period. The increasing investments in smart grid technologies to measure and analyze data and asset management of advanced metering infrastructure (AMI) are the factors driving the market growth. However, the requirement of high upfront cost for smart gas infrastructure is hampering the market growth.

Smart gas refers to an emerging technology that is capable of automatically measuring the primary parameters like temperature, pressure, and volume of the gas that flows in the pipeline.

Based on the technology, the advanced metering infrastructure (AMI) segment is going to have lucrative growth during the forecast period owing to their operational advantages, and the adoption of advanced metering infrastructure.

By geography, North America is going to have high growth during the forecast period owing to the increasing interest of the consumers towards billing transparency and the expensive nature of energy. Also, a rapid shift towards cost-effective options is positively impacting the market in this region.

Some of the key players profiled in the Smart Gas Meter Market include Aclara Technologies LLC, Apator Group, Badger Meter, Inc, DIEHL Metering, EDMI Limited, EMH Metering GmbH & Co KG, Holley Technology Ltd, Honeywell International Inc, Itron Inc, Kamstrup A/S, Landis+Gyr, Schneider Electric , Siemens AG, Xylem, Inc, and Zenner.
