Abstracts

According to Statistics MRC, the Global Smart Homes Market is accounted for \$26.3 billion in 2015 and is expected to reach \$80.89 billion by 2022 growing at a CAGR of 17.41% from 2015 to 2022. The smart homes market has been witnessing remarkable growth, mainly driven by its eco friendly nature. Machine-2-Machine communications, product growth in Internet of Things (IOT), increasing cost of energy are the key factors driving the market growth. Need for long serving and reasonable products are restraining the market. Energy management, safety and security and lighting control offer great investment opportunities for players in the market. The operating and maintenance cost, user awareness, internet security demand for housing are some of the challenges faced by the players.

North America accounted for the largest market share, led by the maximum adoption of smart homes systems. The U.S. is likely to remain as the key market for smart homes throughout the forecast period driven by its high adoption rate and development. Cost effectiveness of these products is increasing the demand for smart homes market in both developed and developing regions. The Asia-Pacific smart homes market is anticipated to grow at the highest CAGR amongst all regions, backed by its resilient GDP growth and the growing real estate market.
