Abstracts

According to Statistics MRC, the Global Sodium Chlorite Market is accounted for \$206.18 million in 2020 and is expected to reach \$304.62 million by 2028 growing at a CAGR of 5.0% during the forecast period. Factors such as increasing need for water and waste water treatment and rising demand for disinfectants are driving the growth of the market. However, stringent government regulations in the developed economies are hampering the growth of the market.

Sodium chlorite is found as a white crystalline solid that is difficult to burn but plays an important role in speeding up the process of burning of various organic substances. This chemical is capable of forming specific combustible substances.

Based on the end user, the medical segment is going to have a lucrative growth during the forecast period as it is used to treat common ailments such as cold and chronic fatigue. By geography, Asia Pacific is expected to grow at a faster rate during the forecast period owing to the rising demand from paper and pulp industry.

Some of the key players profiled in the Sodium Chlorite Market include Oxychem, Osaka Soda, Otsuka Chemical, Ercros, Yancheng Huaou Industry Group, ERCO Worldwide/Superior Plus, Shandong Gaomi Gaoyuan Chemical Industry, Japan Carlit, Fengchen Group, and Dongying Shengya Chemical.
