Abstracts

According to Statistics MRC, the Global Soil Treatment Market is accounted for \$26.52 billion in 2016 and expected to grow at a CAGR of 9.2% to reach \$49.25 billion by 2023. Factors such as growing organic food market, demand for high-quality food, upcoming soil and water remediation technologies and shrinking arable land are driving the market growth. However, emergence of bio-tech seeds, low technical knowledge among farmers and stringent regulations are restraining the market growth. Rapid growth in the bio-agrochemical, demand for herbicide tolerant seeds, government initiatives for creating vigilance among people are some of the major trends prevailing in the market.

The soil protection segment is anticipated to be the largest market followed by the organic amendments segment, in terms of value. North America accounted for the largest market share, followed by Europe. Asia Pacific is the fastest growing market owing to rapid growth in agricultural sector.

Some of the key players in Global Soil Treatment market are Syngenta AG, BASF SE, ADAMA Agricultural Solutions Ltd., Solvay S.A., Monsanto Company, American Vanguard Corporation, Arkema S.A., Novozymes A/S, Platform Specialty Products and Kanesho Soil Treatment.
