Abstracts

According to Statistics MRC, the Global Subsoiler Market is expected to grow at a CAGR of 6.0% during the forecast period. Increasing fuel prices, introduction of precision agriculture in agricultural industry, rising demand for alternative fuels are some of the major factors fuelling the market growth. Volatility of raw material prices is one of the major factors restraining the growth of the market.

A subsoiler or flat lifter is a tractor-mounted farm implement used for deep tillage, loosening and breaking up soil at depths below the levels worked by moldboard ploughs, disc harrows, or rototillers. Subsoilers are used as a part of preparatory cultivation in the process of primary tillage. It is a tillage tool which will improve growth in all crops where soil compaction is a problem.

By Product, carried subsoiler segment held the highest market share as users can easily install clod breaking discs and toothed roller attachments to these subsoilers. Asia Pacific is dominating the Subsoiler market and the growth of this region is due to the great support provided by the government in the form of incentives and regulations to support agricultural development.

Some of the key players in global Subsoiler market include Great Plains Manufacturing, AGCO, Landoll, Deere & Company, Browns Agricultural, Moroaratri, Stoess Manufacturing, Agrimir, Evers Agro, Unverferth, Erth Engineering, Lemken, Lowery Manufacturing, Minos Agricultural Machinery and Pastò Agriculture.
