According to Stratistics MRC, the Global Sulfur Fertilizers Market is accounted for \$4.60 billion in 2020 and is expected to reach \$6.39 billion by 2028 growing at a CAGR of 4.2% during the forecast period. The increasing sulfur deficiency in soils and high utilization of traditional sulfate fertilizers are driving the market growth. However, the growing trend of consuming organic fertilizers may restrain the market growth.

Sulfur fertilizers are plant growth agrochemicals containing sulfur. They help in minimizing sulfur deficiency in crops and encourage growth. Sulfur fertilizers are added to the soil to refill the lost sulfur.

Based on type, the sulphate containing compound fertilizers segment is going to have lucrative growth during the forecast period due to the high consumption of traditional and new sulfate fertilizers, such as single superphosphate, ammonium sulfate, potassium sulfate, sulfates of micronutrients, and ammonium phosphate sulfate.

By geography, Asia Pacific is going to have significant growth during the forecast period due to the increased awareness among the farming community has prompted the use of fertilizers. Also, the increasing demand for food grains, the need for efficient use of land is driving the market in the region.

Some of the key players profiled in the Sulfur Fertilizers include Compass Minerals, Coromandel International Limited, Deepak Fertilizers and Petrochemicals Ltd, EuroChem Group, Koch Industries, Inc, Nufarm Limited, Nutrien, Ltd., Nutri-tech Solutions Pty Ltd, Sulphur Mills Ltd, Tessenderlo Kerley, Inc, The Kugler Company, The Mosaic Company, Tiger-Sul Products LLC, Yara International ASA, and Zuari Agro Chemicals Ltd.
