Abstracts

According to Stratistics MRC, the Global Surface Computing Market is accounted for $12.00 billion in 2017 and is expected to reach $146.90 billion by 2026 growing at a CAGR of 32.0% from 2017 to 2026. Increasing use of surface computers for business purposes, growing applications in entertainment & hospitality sectors and rising demand from emerging economies are some of the key factors propelling the market growth. However, high cost of surface computing is hindering the market growth.

Surface computing means the table shape computer that applies specialized Graphical User Interface (GUI) in which the conventional GUI elements is restored with natural and everyday objects that are able to interact with the exterior of the display. It is a tabletop computer that enables multiple user interaction and provides multi touch facility at the same time.

By End User, retail segment has a considerable growth in the market. Surface computing not only makes transactions faster and easier but also offers personalized computing environment to the business owners. Surface computing also facilitates businesses in their green initiatives, allowing them to cut back on paper, ink, and other office supply waste.

Based on geography, Asia Pacific is expected to witness the fastest growth rate during the forecast period. The growth is due to rapid development of the entertainment and hospitality industries, which is anticipated to generate massive consumer support for advanced technology in the market.

Some of the key players in the Global Surface Computing Market include Microsoft Corporation, 3M Co, Apple Inc, Planar Systems Inc., Eyefactive GmbH, Touchmagix
