## Abstracts

According to Statistics MRC, the Global Surfactants Market is accounted for \$31.29 billion in 2017 and is expected to reach \$58.85 billion by 2026 growing at a CAGR of 7.3% during the forecast period. Increasing personal care industries, extensive use of surfactants in household detergents and changing standard of living in developing economies are some of the key factors fuelling the market growth. However, volatility in raw material prices and environmental issues are hindering the market growth.

Surfactants are the organic compounds with presence of both hydrophobic and hydrophilic group. Surfactants allow oil molecules to mix with or 'dissolve' in water. Their properties such as wet ability, detergency, emulsion, dispersion, stabilization, and foam/froth have vast practical applications in variety of industries.

Amongst type, detergents segment witnessed considerable growth in the market. Detergents are widely used for industrial and household purposes. With rising need for more capable and superior detergents, the demand for surfactants from the detergents industry has increased. By geography, Asia pacific is expected to have a significant growth in the market owing to growth in disposable incomes, increasing demand for soaps, personal care and detergents in this country, which, in turn, is boosting the market.
