According to Statistics MRC, the Global Tipper Body Equipment market is estimated at \$3145.23 million in 2016 and is expected to reach \$4489.56 million by 2023 growing at a CAGR of 5.2% from 2016 to 2023. Increasing urbanisation, booming construction & mining sectors, technological innovation in tipper body products and rapid adoption of automation are some of the key factors fueling the market. However, factors such as high fuel consumption and negative environmental impact of tipper equipment & vehicles are hampering the market growth. In addition, improvement of effective equipment with better load-carrying capacity and training to drivers by manufacturing entities are likely to present huge growth opportunities for the market.

Emerging economies such as China, India, and South Africa are witnessing sustainable growth due to the development of cost-competitive products to maximise penetration. Product development with advanced diagnosis systems is the key strategy adopted by developing regions for the market growth.

Some of the key players in the market include VFS Southampton Ltd, Thompsons (UK) Ltd., Schmitz Cargobull AG, North West Tippers Ltd., Marrel, Ingimex Ltd., Hyva Global B.V, Gorski Engineering (Pty) Ltd, Fruehauf Ltd, F.X.
