Abstracts

According to Statistics MRC, the Global Transplantation Market is expected to grow at a CAGR of 11.5% during the forecast period 2016 to 2022. The growth of the market is propelled by the growing prevalence of organ failures, rising government & NGO initiatives to support organ donations and rising number of patients suffering from chronic diseases. However, transplantation rejections and restricted medical reimbursements for organ donations are the major restraining factors limiting the market growth. By type, the most commonly used kidney transplantation is expected to dominate the global market, followed by heart and liver transplantation. North America is anticipated to sustain its dominance over the forecast period.

Some of the key players in this market include Medtronic Plc, GE Healthcare, Novartis AG, F. Hoffmann-La Roche, Abbott Laboratories, Johnson & Johnson, Stryker Corporation, Luminex, Biomet, Inc., Pfizer, Arthrex, Inc., Smith & Nephew, Baxter International Inc., Teva Pharmaceuticals and Bio-Rad Laboratories.
