## **Abstracts**

According to Statistics MRC, the Global Turf Grass and Turf Solution Market is accounted for \$13,829.16 million in 2020 and is expected to reach \$24,664.00 million by 2028 growing at a CAGR of 7.5% during the forecast period. Rising construction of smart homes, growing awareness about turf grass and increased applications of turf grass in the residential lawns are driving the market growth. However, lower resistance to heat and harshness of turf grass and the rising artificial or synthetic turf grass are hampering the growth of the market.

Turf grass and Turf solutions are basically developed for the purpose of controlling soil erosion, minimizing growth of weeds and reducing the dust generated by foot traffic. Turf grass has high quality and a soothing color surface and is environmental friendly and recyclable in nature.

Based on the inputs, the agrochemicals segment is going to have lucrative growth during the forecast period as the. Agrochemicals prevent soil erosion by killing the pesticide before they damage the soil. It also helps the plant grow healthier by providing all the nutrients it requires.

By geography, North America is going to have high growth during the forecast period as the North America area has the maximum number of golf courts and gardens in the world, and requires vast volumes of pesticides are used to maintain the turf grass. The United States contains the majority of Kentucky bluegrass which is the market leader for
