Abstracts

According to Statistics MRC, the Global Two-Wheeler Transmission System Market is expected to grow at a CAGR of 8.3% during the forecast period 2016 to 2023. Increasing demand for high performance electric motorcycles in European region, rising demand for light weight transmission systems, technological advancements in transmission systems, increased fuel efficiency and low emission levels with transmission systems are the factors driving the two-wheeler transmission system market. However, high cost of advanced transmission systems, fluctuations in raw material prices, high adoption and maintenance cost may hinder the market growth.

Asia Pacific is expected to grasp major revenue shares in two-wheeler transmission system market and is expected to grow with a high CAGR during the forecast period. The growth of this region is attributed to swiftly rising manual transmission motorcycles, increasing sales of semi-automatic motorcycles in emerging countries such as China and India.

Some of the key players in global two-wheeler transmission system market include EXEDY, Biperformance- Shift FX, F.C.C., Hinson Clutch Components, Honda (Honda-DCT), Hyper Racing, Ricardo, Schaeffler, Sigma Performance, SURFLEX and Yoyodyne.
